Phase I - Equitable Access to Effective Educators School Diagnostic

Introduction

National data show that poor and minority students, English Language Learners and students with disabilities continue to be taught more often than their peers by inexperienced, out-of-field or ineffective teachers. As a result, the United States Department of Education (USDE) required states to develop equity plans and use evidence based strategies to address this issue. Kentucky's plan is focused on teacher preparation; recruitment, hiring and placement of teachers; providing supports for on-going, job-embedded professional learning; and strategies to retain teacher and leaders.

All districts and schools in Kentucky are required to identify barriers and develop strategies to address these issues to achieving equitable access to effective educators for students most at risk. This is being incorporated within the Comprehensive District and School Improvement Plans. This diagnostic should be used as tool for identification of barriers and a catalyst for development of strategies that will result in novice reduction for gap closure. Strategies will be incorporated into the Comprehensive School Improvement Plan.

School Equity Data (1)	Complete the School Equity Data tab for this diagnostic. Include at least one other self-selected indicator for consideration. *Self-selected data could come from a variety of sources. It should be relevant to the needs of the school. Examples could include: principal, teacher or student demographic data; percentage of National Board Certified Teachers or Advanced Degrees; teacher or principal effectiveness data, TELL, turnover. **The school should complete the information in the chart ONLY for the subgroups reported in the School Report Card where the data has been suppressed to protect student identification required by the Family Educational Rights and Privacy Act (FERPA). Follow the steps below:	I acknowledge that I have uploaded the School Equity Data.		Pikeville Elementary School Equity Data 2015-2016

Provide a brief analysis the school data from the chart. Include any trends, note-worthy data points or perceptions the data has provided related to equitable access to effective educators.

The majority of our students are being taught by teachers with 4 or more years of experience. Our largest group for Gap students would be free and reduced lunch, followed by students with disabilities.

After the data analysis is complete, the school will then identify the barriers (challenges) for some of the identified trends. An identified barrier, for example, could be higher teacher turnover in priority schools as compared with non-priority schools. Once the barriers have been identified, then root causes of why the barriers exist will be included.

We have an increase of poverty this year (2016-2017) by almost 8%. Our new food service director has made a real effort to try and provide for the students' needs by getting parents to turn in paperwork. This also helps us to see we have a higher percentage of poverty than we may have realized. With poverty comes barriers schools need to address. We have been providing backpacks for students to take home to ensure they have food for the weekend.

Label	Assurance	Response	Comment	Attachment
Goal Setting (4)	Complete the School Equity Goals tab. Use the school's most recent measures in the Equity tab of the School Report Card to set equitable access goals for the next three years. The measures include: Working Conditions, Overall Teacher and Leader Effectiveness, Overall Student Growth, Percentage of new and KTIP teachers, and Percentage of Teacher Turnover. ***Goals should reflect an analysis of barriers, root causes and strategies.	I acknowledge that I have uploaded the School Equity Goal Data.		School Equity Goals

Comprehensive School Improvement Plan

Pikeville Elementary School

Equitable access to effective educators must be reflected in the Comprehensive School Improvement Plan. Strategies could include, but are not limited to, recruitment; hiring and placement of teachers and/or students; providing supports for on-going, job-embedded professional learning to improve teacher and leader effectiveness; and strategies to retain teacher and leaders, particularly in high needs schools. Once implemented, these should assist the school in meeting the goals set in the previous section.

If there are strategies and activities within one of the five major goals of the CSIP, which adequately addresses equitable access, the school may select the appropriate goal, objective, strategies and activities.

OR

The school may create a new goal to address equitable access to effective educators. Once a new goal has been created, the school will need to include appropriate objectives, strategies and activities.

The school may choose to provide an optional narrative response to include any additional information, but this is not required.

Goal 1:

Phase I - The Missing Piece

Introduction

This report provides a comprehensive response to the six objectives of The Missing Piece set for the by the Commissioner's Parent Advisory Council (CPAC). This diagnostic uses performance measurement and progress, as well as relationship building, resources and support to build capacity within schools and districts measure parent involvement and the desired outcome being made. Use the links below to navigate the diagnostic content and respond to the questions.

Reflection

Reflect upon your responses to each of the Missing Piece objectives.

I feel like our school needs to improve in obtaining and growing community partnerships ad resources. We will set in place, through cooperation with our Family Resource center, a better plan to connect with and document community partnerships.

Improvement Plan Stakeholder Involvement

Introduction

The responses should be brief, descriptive, and appropriate for the specific section. It is recommended that the responses are written offline and then transferred into the sections below.

Improvement Planning Process

Improvement Planning Process

Describe the process used to engage a variety of stakeholders in the development of the institution's improvement plan. Include information on how stakeholders were selected and informed of their roles, and how meetings were scheduled to accommodate them.

The school plan and any changes are emailed out to all stakeholders, including over 500 parent email addresses.. All parents are invited to attend CSIP meetings. They also may contact the principal to share their concerns or ideas.

Describe the representations from stakeholder groups that participated in the development of the improvement plan and their responsibilities in this process.

Teachers, district administrators, School administrators, parents, FRYSC director. All had the opportunity to provide input during the process.

Explain how the final improvement plan was communicated to all stakeholders, and the method and frequency in which stakeholders receive information on its progress.

The final plan will be emailed to all stakeholders, placed on school/district website. Hard copies can be presented to any person who requests

Phase I - Needs Assessment

Introduction

The purpose of the School Needs Assessment is to use data and information to prioritize allocation of resources and activities.

Data Analysis

What question(s) are you trying to answer with the data and information provided to you? What does the data/information tell you?

What does the data/information not tell you?

We always look for ways to improve using data.

The information provided to us helped us to determine that we need to focus on improving scores among our gap students.

The data provided to us does not tell us the home relationships our students have.

Areas of Strengths

What were the areas of strength you noted? What actions are you implementing to sustain the areas of strength? What is there cause to celebrate?

We had good growth in math and continued to lead the state in our reading scores. Our 5th grade students lead the state in reading and math.

We are continuing to focus on scheduling and time in the classroom to help us continue to grow.

Opportunities for Improvement

What were areas in need of improvement? What plans are you making to improve the areas of need?

Our two main areas of improvement noted were: Writing and novice reduction

We have made staff changes concerning writing and implemented a new resource curriculum. To assist in novice reduction, we have implemented a new Mentoring program.

Conclusion

Reflect on your answers provided in the previous sections. What are your next steps in addressing areas of concern?

We must continue to focus on writing and novice reduction. Improvement in these two areas will greatly effect our performance

Phase II - KDE Compliance and Accountability - Schools

Introduction

The process of Improvement Planning in Kentucky is used as the means of determining how schools and districts will plan to ensure that students reach proficiency and beyond by 2015. The process focuses school and district improvement efforts on student needs by bringing together all stakeholders to plan for improvement, by focusing planning efforts on priority needs and closing achievement gaps between subgroups of students, by building upon school and district capacity for high quality planning, and by making connections between the funds that flow into the district and the priority needs in schools.

Your school's plans for improvement must be based on careful and honest analysis of data, address all content areas, and clearly address gaps in student achievement.

Planning and Accountability Requirements

The school has identified specific strategies to address areas for improvement identified in the TELLKY Survey results.

Executive Summary

Introduction

Every school has its own story to tell. The context in which teaching and learning takes place influences the processes and procedures by which the school makes decisions around curriculum, instruction, and assessment. The context also impacts the way a school stays faithful to its vision. Many factors contribute to the overall narrative such as an identification of stakeholders, a description of stakeholder engagement, the trends and issues affecting the school, and the kinds of programs and services that a school implements to support student learning.

The purpose of the Executive Summary (ES) is to provide a school with an opportunity to describe in narrative form the strengths and challenges it encounters. By doing so, the public and members of the school community will have a more complete picture of how the school perceives itself and the process of self-reflection for continuous improvement. This summary is structured for the school to reflect on how it provides teaching and learning on a day to day basis.

Description of the School

Describe the school's size, community/communities, location, and changes it has experienced in the last three years. Include demographic information about the students, staff, and community at large. What unique features and challenges are associated with the community/communities the school serves?

Pikeville Elementary School, part of the Pikeville Independent School District, sits at 105 Bailey Boulevard Pikeville, Ky. Presently our school is one of the few schools in our region that is considered growing. We feel that our diverse, growing community and challenging academics are two main contributors to that growth.

Below you will find pertinent information about our school as of 10/15/15. If you have any questions please feel free to contact me at robert.jones@pikeville.kyschools.us or 606-432-4196 ext 2103

*Famous as one of the original towns of the Hatfield and McCoy feud.

Unique Challenges and features associated with the region:

We feel that our unique challenges associated with are city are three-fold;

1st - Although we are in one of the most progressive towns of our region, we are still limited by our geographic location.

2nd - We have had to adjust to a changing demographic in our area over the last few years with the addition of more low-median income housing.

3rd - almost a direct opposite of #2, we have had to deal with a "changing" population in our school. With the college, hospital, and

professional schools in our town, we are consistently working with students who stay for only a little while. We are also getting new students consistently throughout the school year.

School's Purpose

Provide the school's purpose statement and ancillary content such as mission, vision, values, and/or beliefs. Describe how the school embodies its purpose through its program offerings and expectations for students.

The mission of the Pikeville Independent School District is to provide a meaningful, integrated education in a positive, nurturing environment to develop each student as a lifelong learner and a responsible citizen in a global community. Our school is a place where students can become what they dream of becoming, a place where there is hope, trust and love. A place where being a good student is a good thing. It is also a school where great importance is placed on "community" and the value of family. We prioritize making sure that students are ready to be productive individuals who can compete in a global society when they graduate. We also know that it is equally important for our students to be successful in school. Our goals include; RTI in math, reading and behavior, using formative and summative assessments, differentiated instruction and realigned curriculum to new standards. We are very proud of our school's academic success. We are consistently one of the top schools in our region and presently are a two time Kentucky Distinguished School. Please peruse our test scores at <http://openhouse.education.ky.gov>

In addition, our school administers for reading assessment the Early STAR/STAR assessment 3 times/year, Discovery Education in various subjects, and for math we have several different programs. These computerized assessments yield detailed information about individual student progress from one testing cycle to another and provides detailed data that is used by teachers to make decisions about instruction. Many other types of formative and summative assessments are used by teachers to assess learning progress. The staff frequently collaborates to discuss student work and assessment results and how to improve instruction.

Our staff attends professional development activities provided by the school district and other providers relating to such research-based topics as the Positive Behavior Support System, instructional differentiation, using formative and summative assessments via Professional Learning Communities. We are developing collaborative learning teams around subjects, grade levels, and specific topics and will begin meeting frequently.

Our school improvement team meets on an annual basis to review data relating to our present goals. Collaborative learning is a priority in our school and flexible opportunities are made available to accommodate this. Data drives what we do in our classrooms and we meet with our local Board of Education/Superintendent to discuss ways to continually improve. We work closely with the school district for English Language Learned, gifted and talented, speech, other therapy services and psychologist services. Our school has an active volunteer program with a total accumulation from the 2015-2016 school year of 2,465 volunteer hours.

The Pikeville Independent School System strives to create and maintain an outstanding, positive image that reflects our community's high expectations. We strive for effective communication tools and to maintain open channels of communication between the home, community, and schools; and keep all constituents informed of the affairs of the school system. The Pikeville Independent School System is continually seeking additional ways to share information with its stakeholders and developing effective partnerships with these individuals, while at the same time, working internally to establish additional programs which will motivate and reward our students and staff. Promoting our school system instills pride within the students, faculty, staff, parents, community, and all alumni where ever they may be. We must continue to make the commitment of telling the story of the students and faculty in the Pikeville Independent School System.

Additional Information

Provide any additional information you would like to share with the public and community that were not prompted in the previous sections.

At Pikeville Elementary we make an attempt to teach the whole child. Every child is respected and we find ways to promote growth in every area of student life from academics to extra curricular activities, thereby providing a climate conducive to the development of a well-rounded student. We teach respect and tolerance and that it is cool to be smart as well as instill a desire to succeed and excel above and beyond standardized expectations. It is our desire to teach children to become productive, community-minded citizens with a sense of self worth, pride in school and community.

Geographically we have been limited in opportunity as compared to a larger urban area however, we consider ourselves to be an oasis in the mountains.
